Skills

HTML

CSS

JavaScript

React

Redux

TypeScript

Node.js

Express

MongoDB

Jest

With a passion for web development ignited many years ago after creating my first HTML website, I have honed my technical skills and creativity to become a seasoned professional in this field. My technical aptitude and imaginative outlook have made web development the perfect fit for me, providing a constantly challenging and rewarding journey. I have accumulated years of experience and a track record of delivering high-quality, mobile-optimised websites using modern technologies such as React, CSS, Node.js, and TypeScript.

Web Development Experience

- Achieved successful completion of multiple mobile-optimised websites within tight 2-week timeframes, utilising HTML, CSS, and React

- Collaborated with a team of 4 to enhance agency access and utilisation of client data in custom web application through implementation of data fetching methods from company REST API

- Efficiently optimised organisational time through implementation of MongoDB as a straightforward NoSQL database solution to store customer information

- Developed a portfolio of over 20 custom web applications with back-end servers using a combination of React, Redux, TypeScript, Sass, Node.js, Express, and MongoDB

- Provided design services for over 30 different websites using Figma

Work History

02 - 2022 - current

Web Developer

Learn&Co - London, United Kingdom

- Collaborated with team to develop main web application using React and its features such as hooks, props, and Redux

- Improved efficiency by proactively constructing new web pages and components ahead of schedule

- Ensured accessibility and full responsiveness for all clients through thorough unit testing with Jest
